World’s Largest Lesson (WLL) is a global educational campaign run in partnership with UNICEF. WLL promotes the use of the United Nation’s Sustainable Development Goals in learning so that children can contribute to a better future for all. From citizenship and justice to climate change and the environment, WLL aims to inspire children to make a difference. WLL is a programme from Project Everyone.

Slam Out Loud (SOL) uses the transformative power of performance and visual arts to help build creative confidence and skills like communication, critical thinking and empathy in children from disadvantaged communities. SOL works with professional artists and e-learning resources to help children build the skills to dream bigger, and create mediums through which to raise awareness of issues like gender, climate action and social justice - in the hope of creating more positive futures.

Artivism for Nature lesson plan is conceptualized, created and designed by Slam Out Loud in partnership with World’s Largest Lesson Supported by Global Commons Alliance.

Learning Outcomes

Students learn what it means to be nature positive while also understanding arts as a powerful medium to advocate for change.

Students become aware of the complexities in environmental issues and create expression through artivism.

Students develop empathy towards nature and other living species and are inspired to take corrective measures to conserve biodiversity.

Themes elaborated

What does Nature Positive mean?
Nature positive is a disruptive idea that makes us think differently about how we live in the world. It is about understanding that nature is our life support system and we must halt nature loss by 2030. Instead of cutting down and destroying nature, nature-positive calls for us to regenerate, restore and regrow nature.

Artivism as an approach to Nature Positivity
Art + Activism = Artivism, is a transformational approach where you use art to bring about social change or raise awareness about a topic.

Engaging with Artivism for Nature lesson plan, students’ art-work of their favourite tree developed through the Step 4 #Artivism4Nature activity will be uploaded to World’s Largest Lesson’s platform, becoming a part of a virtual forest from children and youth from all around the world, as their commitment

Nature Positive Youth like YOU would take a LEAP forward to bring about a positive shift in the crisis we are in!

📚 LEARN about artivism and being nature positive.
🌟 EXPERIENCE and understand the crisis to develop solutions.
❤️ ADOPT nature positive policies, strategies, and habits.
 علين PRESERVE for long term sustainability and equitable growth.
Sustainable Development Goals -

The Sustainable Development Goals (SDGs) are a set of 17 interlinked Goals that were set out by the United Nations in 2015. The aim of these Goals is to achieve a more sustainable future for all. Three of these Goals aim to protect the environment, Goal 13 - Climate Action, Goal 14 - Life Below Water and Goal 15 - Life on Land. The following targets are especially relevant to Nature Positivity.

Target 15.5 - Protect Biodiversity and Natural Habitats

Take urgent and significant action to reduce the degradation of natural habitats, halt the loss of biodiversity and, by 2020, protect and prevent the extinction of threatened species.

Target 14.2 - Protect and Restore Ecosystems

By 2020, sustainably manage and protect marine and coastal ecosystems to avoid significant adverse impacts, including by strengthening their resilience, and take action for their restoration in order to achieve healthy and productive oceans.

Hello Friend!
My name is SOLmate, I will take you through the lesson plan and even do the activities with you! Reading the above SDGs, it made me wonder, while there are so many Goals to sustain the environment, what could be a reason that there is no Goal for nature alone? Do you think there should be a unique Goal for nature? Think about it!

Facilitator’s Note:

By engaging in this resource, students will

SAY: They will pledge to be Nature-Positive

DO: Advocate for social change through art, Artivism

FEEL: Motivated to respond positively to climate action

Support us in teaching students the importance of their act of artivism. The tree drawing is a stamp, a symbol to show world leaders that they are committed to being nature-positive and leaders should be too.

Support students in responding and recording their thoughts, do share them with us at -

Prompts

As you imagined yourself amidst nature, what are some things that nature has taught you?

All elements in nature are interconnected with each other. Share two ways in which nature supports you?
Storytelling - Folk Tale

Storytime!!!
The story Rahul and the Selfless Tree is an adaptation of The Giving Tree by Shel Silverstein. Listen to the tale and ponder over some reflective questions mentioned below.

Ponder Over

What are some values that the tree showed in the story?

How do you think Rahul’s actions might have hurt the tree?

Can you list down three ways in which we may be hurting trees?

If you were in Rahul’s place, what might you have done differently?

If you were to write a Tiny Tale (a tale comprising <140 words) expressing your feelings towards the trees and the abundance they give us, what would this tale look like? Think about how we hurt trees and what we can do to protect them.

Our Tiny Tale looks like this

I met an old tree full of energy. It lets the squirrels play hide and seek! It was home to the birds, snakes and lizards, who often gave me apples to eat. I went up to the tree and asked one day, “What is it that you will give me, tree?” It replied with a vigorous shake, spreading its branches to give me shade. I had met a tree, so warm and kind. The next day I took another seed, to sow, next to the tree. What I saw filled me with shock, the tree was uprooted, apples rotten, the branches weak. I decided not to weep. I gathered my friends and called out to the world, to stop the atrocities and plant more trees. When I grow up, I aspire to be this tree, strong, empathetic, gentle and kind.

Close your eyes, take a moment, and think about what trees are for you!
Reflect - Worksheet
Being Nature Positive

On a sheet of paper, draw a tree and answer the prompts given below. Share your responses with us.

What does nature mean to you?
Nature is like nurturing friendships, you build companions that love, help, care for and support each other. Nature always reminds me that happiness is always within myself and when I decide to look deep enough in nature I will always be reconnected with it.

If your favourite tree could talk, what would it say to you?
The air will be cleaner if you plant more of us, I also miss having my friends around.

Which plant/tree do you resonate with the most and why?
I resonate the most with a banyan tree, its magnificent branches and roots make me realize how all of us on this planet are connected and one.

If you could give something back to nature, what would that be?
Care, kindness and time. I would plant them more, visit and water them timely, ensure it grows.

What does nature mean to you?

If your favourite tree could talk, what would it say to you?

Which plant/tree do you resonate with the most and why?

If you could give something back to nature, what would that be?
Expressions - Guided Art Activity

#Artivism4Nature

**Players:** Single Player  
**Difficulty level:** Medium  
**Total Time:** 30 Mins  
**Gear:** Colours, pencil, eraser, a sheet of paper, charcoal, paints, collage, any other craft/art material that you like  
**Gifts of the Game:** Creativity, Critical thinking, Empathy  
**Age Group:** 8-14

1. **Checking-in**
   
   The planet takes care of us in innumerable ways, how could we take care of it in return?
   
   Close your eyes for a moment and take deep breaths, think about what you can do as an act of love, care, and kindness towards our planet.
   
   Inhale through your nose deeply, hold it for three seconds and exhale.
   
   Repeat this thrice.

2. **Choose your favourite tree**
   
   You must have seen many beautiful trees around you. Each tree is special in its own way and has a unique personality, just like you!
   
   It bears leaves, fruits and flowers.
   
   **Which tree would you like to draw?** You could take some time, go outside if you want, look at the different trees and choose one that you wish to draw.
   
   Think of a name for your favourite tree and write it as a heading on your sheet of paper.

3. **Draw and Colour**
   
   Draw your favourite tree on a large piece of paper.
   
   Remember to draw all parts of the tree: its roots, trunks, branches, leaves, flowers and fruits. You can make your tree in any way that you like!
   
   Use one, two or all of these methods to make your tree:
   
   You can also use other methods that you like to create your #Artivism4Trees art-piece.
   
   a. Cut leaves out of waste paper and collage it on paper to make your trees. Draw the trunk and other parts of your tree.
   b. Find small fallen leaves, dip it in paint and take prints of it around the branches you draw.
   c. Take a print of a ladyfinger, potato etc to make prints of leaves.

4. **Decorate your tree**
   
   Look at your tree and think about why trees are important to you. Now think of symbols that you can draw to show the importance of trees.
   
   For eg., I will draw a heart to symbolise the important lesson of being kind and helpful, that the tree has taught me.

5. **Share**
   
   Share your #Artivism4Nature art-work with us - Share your Artwork here.
Reflect and Write
Extention Activity

Each part of the tree tells us something important about our own identities and experiences. Let us take some time to reflect on what each part of the tree is saying about us.
